

Prerequisites: Each delegate must create a personal profile in WINDA and provide their WINDA ID prior to completing GWO training.

- Prior to beginning practical training for a given module, the delegate must complete the associated E-Learning Module.
- The total period for completing theory and practical elements for a given module must not exceed 4 weeks.

Course Length: 0.5 day at the training center for practical training and assessment (following the completion of E-Learning modules). Total course duration: 3 hours 20 minutes. Course length shall vary depending on the number of delegates.

Class Size: The maximum number of delegates that may be trained and tested per instructor shall be twelve (12) in the classroom session and six (6) in the practical session.

Course Objectives: The aim of this module is to enable the participants to prevent fires, make appropriate judgements when evaluating a fire, manage evacuation of personnel and ensure all are safely accounted for in the event of an unmanageable fire. If the incident is judged to be safe, the participants should be able to efficiently extinguish an initial fire by using basic handheld firefighting equipment.

This training is conducted in accordance with the Fire Awareness Module of the GWO Basic Safety Training (BST) Standard and successful completion will enable participants to:

- 1) Act independently to identify fire hazards and prevent fires in a wind turbine environment.
- 2) Take responsibility for assessing a fire and, if needed, be able to select the right extinguishing media according to the fire classes.
- 3) Take responsibility for the evacuation of personnel and ensure all are safely accounted for in the event of an unmanageable fire.
- 4) Act independently in efficiently extinguishing an initial fire by using basic handheld firefighting equipment, if the incident is judged to be safe.

Successful completion of this course results in the following certificate:

- GWO Fire Awareness (FAW)

Course Design:

- Narrated digital learning modules
- Power Point® / Lecture / Audio Video / Visual Aids
- Practical Exercises

Successful Course Completion:

- Delegate must demonstrate understanding of theoretical training of each module prior to participating in practical training.
- Successful completion of practical sessions is mandatory.

- If a participant fails to meet the demands of the Module, they shall attend a new Module.

Course Content Summary:

- Computer Based Training
- Classroom
- Practicals

Breaks: 10 minutes (approximately every hour)

Lunch: 1 Hour, if applicable

Course Outline:

- Introduction
- Legislation
- Fire combustion and fire spread
 - Types of fires
 - Fire triangle
 - Fire spread
 - Fire gases
- Fire extinguishing
 - Contingency plan
 - Assessing the fire
 - Fire classes
- Fire prevention
 - Fire hazards
 - Fire prevention measures
- Firefighting equipment in a Wind Turbine Generator (WTG)
 - Pre-use inspection
 - Correct use of firefighting equipment
- Training Review

Practical Session:

The Practical training shall verify that the delegate is able to demonstrate the following:

- Pre-use inspection of firefighting equipment
- Correct use of firefighting equipment
- Practice firefighting: CO₂, Fire blanket
- Participation in scenario-based training:
 - Safe evacuation of smoke-filled environment
 - Correct actions when discovering a fire or smoke in a WTG

Training Center Provided Material:

- Course materials & equipment
- PPE

Delegate Requirements:

- Must possess good physical health as the practical training is physically demanding.
