

Prerequisites: The course participant shall have created a personal profile in WINDA and have provided their WINDA ID prior to completing the GWO training.

Course Length: 21 hours. Course length shall vary depending on the number of delegates.

Class Size: The maximum number of delegates that may be trained and tested per instructor shall be twelve (12) in the classroom session and six (6) in the practical session.

Course Objectives: This training is conducted in accordance with the GWO Enhanced First Aid (EFA) Standard and will enable participants to support and care for others working in the industry by possessing the knowledge, skills, and ability of enhanced first aid.

Upon completion of the GWO EFA training, participants will be able to:

- 1) Provide ongoing care to an ill or injured casualty over a short period of time while waiting for professional emergency rescue teams to arrive.
- 2) Take responsibility for administering safe, effective, and immediate lifesaving and enhanced first aid measures in an emergency in a wind turbine generator (WTG) environment
- 3) Act independently in giving assistance in remote areas using advanced emergency equipment and medical teleconsultation.

Successful completion of this course results in the following certificate:

- GWO Enhanced First Aid (EFA)
- GWO First Aid (FA)

Course Design:

- Power Point© / Lecture / Audio Video / Visual Aids
- Practical Exercises

Successful Course Completion:

- Active participation in theory and successful completion of practical session is mandatory.
- If a participant fails to meet the demands of an Advanced Rescue Training module, they shall attend a new Advanced Rescue Training module.

Course Content Summary:

- Classroom
- Practicals

Breaks: 10 minutes (approximately every hour)

Lunch: 1 Hour, if applicable

Course Outline:

- Introduction

- Risks/Hazards/Legislation
 - Risks and hazards
 - First aid guidelines and emergency plans
- Anatomy and Physiology
 - Life conditions for the human body
 - Structure, functions, and signs – the human body
 - Serious and minor injuries – signs, symptoms, and functions
- Management of an incident (emergency response)
 - Safety awareness and personal protection equipment in an emergency situation
 - Management of an incident
 - Emergency rescue teams and medical teleconsultation
- Lifesaving and enhanced first aid using primary and secondary survey
 - The “C” in the A-B-C-D-E principle
 - Primary survey
 - “C” catastrophic bleeding
 - “A”: Airway
 - “B”: Breathing – cardiopulmonary resuscitation (CPR)
 - “C”: Circulation
 - “D”: Disability
 - “E”: Environment / exposure
 - Secondary survey
 - Damage and poisoning through contact with chemical / biological substances
 - Eye injuries
 - Broken bones and injuries to joints/muscles
 - Burns
 - Bites and stings
 - Significant injuries
 - Significant illness
 - Psychological First Aid
- Pain management and further possible medication
 - Application algorithm of pain management
 - Further possible medication
- EFA Exercises (Scenario-based training)
- Training Review

Practical Session:

The Practical training shall verify that the delegate is able to demonstrate the following:

- Managing an incident and providing ongoing care and assessment while waiting for professional help to arrive
- The use of medical teleconsultation and communication media
- Safe approach and initial assessment of the casualty

- Treatment of a casualty with catastrophic external bleeding
- Treatment and assessment on Airway and Breathing
- Practice CPR on adults, correct use of AED and (advanced) ventilatory equipment
- Practice Disability, Environment/Exposure treatment and assessment
- Perform head-to-toe examination
- Practice Chemical/biological contact assessment and treatment
- Use of splint material, and other immobilization/stabilization materials
- Treatment of a bleed (internal and external), burns, shock bites, stings, bleeds, eye injuries, significant illness, during unusual situation
- Correct management of a casualty in pain

Training Center Provided Material:

- Course Materials & equipment
- PPE

Delegate Requirements:

- Must possess good physical health as the practical training is physically demanding.
